

Progress Report – Team 10

What we have done

- Coveralls setup completed. All 3 badges are now green.
- [frontend]
 - Made test code of Review upload, detail page (강태호)
 - Added Google Map search functionality and edit feature on AddReview(-> FormReview) (강태호)
 - Made test code of Main page – review list, friend list (최지혁)
 - Applied user-friendly UI. (최지혁)
 - Implemented user-related feature (login, signup, etc.) (최지혁)
- [backend]
 - Made tag model and simple tagging algorithm using Spacy, Textblob. (차병희, 남재호)
 - Imported Mysql database. (남재호)
 - Upgrade tagging algorithm using stanford core nlp. (차병희)
 - Test word2vec models and decided how to implement recommendation algorithm. (차병희, 남재호)
- Coverage
 - Coveralls

- Base Branch
 - origin/dev

We have changed default branch from master to dev for not modifying master.

What we will do at next sprint

- Add location based review list (강태호)
- Add friend-related features (friend's main, friend's review detail) (강태호, 최지혁)
- Apply more appropriate UI (최지혁, 남재호)
- Find the best word2vec model for our service (차병희)
- Implement recommendation algorithms (차병희, 남재호)
- Fix github wiki for updating changes in our service (남재호)
